BPCOAT Wheels Series

Durable & Aesthetic Coating for Wheel Refinishing

Like a brand new!

Wheel refinishing applications require high mechanical durability, excellent surface quality, and long-lasting aesthetic appearance.

The BPCOAT Wheel Series offers high-performance powder coating systems specially developed for automotive wheels.

Application & Curing (General)

Suitable for electrostatic powder coating application.
Applicable with both Tribo and Corona systems.

180-200°C

10-15 minutes

(Depending on the system)

What Is Wheel Refinishing Powder Coating?

Wheel refinishing powder coatings are specially formulated coating systems designed to withstand stone impact, brake dust, road chemicals, and high temperature fluctuations. These systems create both a protective and decorative film layer on the wheel surface.

BPCOAT WHEEL

Why Should You Choose It?

Because,

- High scratch and abrasion resistance
- Resistance to brake dust and road chemicals
- Excellent adhesion and surface smoothness
- Superior aesthetics and gloss quality
- Long-term color and appearance stability

Product Details

The BPCOAT Wheel Series is specifically designed for the refinishing of steel and aluminum wheels.

- Stone-chip resistant film structure
- High mechanical and chemical resistance
- Homogeneous and smooth surface
- Premium decorative appearance

With proper surface preparation and suitable curing conditions, long-lasting performance is achieved.

Application Areas

- Passenger vehicle wheels
- Commercial vehicle wheels
- Aluminum and steel wheel refinishing
- Automotive service and refurbishing workshops
- Custom-designed and colored wheel applications

*****For maximum performance in wheel applications; surface preparation, primer coating, and proper system selection are critical. Primer + topcoat combinations are recommended based on application needs.***
